PROFESSIONAL SUMMARY

B.Sc. Artificial Intelligence & Data Science student currently pursuing 5th semester with hands-on experience in data analysis, machine learning, data visualization, automation, and AI-driven applications. Experienced in Python, SQL, Pandas, NumPy, Scikit-learn, Excel, Google Looker Studio, IBM SPSS Modeler, Git, and GitHub. Developed practical projects involving automated news aggregation, AI summarization, natural language processing, classification, fake news detection, and dashboard development. Seeking internship opportunities in Data Science, Artificial Intelligence, Machine Learning, and Data Analytics.

PROFESSIONAL EXPERIENCE

SATIC | The Teachers' Club, Data Analyst Intern | Remote

Jun 2026 – Aug 2026

Internship

- Performed **data analysis, data preprocessing, data cleaning, and data management** using Python, Pandas, NumPy, and Microsoft Excel.
- Developed an automated **RSS-based News Aggregation and AI Summarization Pipeline** to collect articles from multiple sources and store structured data in Google Sheets.
- Integrated **AI-generated summaries** with standard article summaries, tags, URLs, and review status to improve content organization and review efficiency.
- Implemented **duplicate detection and structured data validation** to prevent repeated articles and maintain data quality.
- Automated the news collection workflow using **GitHub Actions**, enabling the pipeline to execute once daily without manual intervention.
- Developed a **Gujarat School Analytics Dashboard** using Google Looker Studio to transform school datasets into meaningful analytical insights and interactive visualizations.

PROJECTS

AI-Powered Indian News Aggregation & Fake News Detection System

Ongoing

- Currently developing an AI-powered news aggregation and **fake news detection system** focused on collecting and analyzing Indian news content.
- Designed a multi-source data collection pipeline to fetch news from **RSS feeds, YouTube, and X (Twitter)** for centralized processing.
- Developing automated **text classification, natural language processing, content analysis, and machine learning-based fake news detection** components.
- Designed the workflow for automated data ingestion, preprocessing, feature extraction, classification, and news verification.
- Technologies:** Python, RSS, AI/ML, Machine Learning, NLP, Data Processing, Git, GitHub

Automated News Aggregation & AI Summarization Pipeline

Completed | SATIC

- Developed an automated **RSS news aggregation pipeline** to fetch articles from multiple sources and store structured records in Google Sheets.
- Integrated **AI-generated summarization** with standard article summaries, tags, URLs, and review status for efficient content analysis.
- Implemented **duplicate prevention and structured data processing** to improve data quality and pipeline reliability.
- Configured **GitHub Actions automation** to execute the news-fetching workflow once per day without manual intervention.
- Technologies:** Python, RSS, Google Sheets, GitHub Actions, AI, Data Processing

Gujarat School Analytics Dashboard

Completed | SATIC

- Created an interactive **data visualization dashboard** to analyze and present Gujarat school-related datasets.
- Performed data organization and transformation to convert raw school data into meaningful analytical insights and key metrics.
- Visualized school distribution and analytical metrics using interactive charts and dashboard components in **Google Looker Studio**.
- Technology:** Google Looker Studio, Data Analysis, Data Visualization

Credit Card Fraud Detection

- Developed a **machine learning classification** solution for detecting potentially fraudulent credit card transactions.
- Performed data preprocessing, exploratory data analysis, feature preparation, model development, and evaluation using Python and Scikit-learn.
- Technologies:** Python, Pandas, NumPy, Scikit-learn, Machine Learning

Bank Loan Approval Risk Prediction

- Developed a predictive analytics solution to analyze **loan approval patterns and associated risk factors**.
- Performed data preparation, predictive modeling, and model evaluation using **IBM SPSS Modeler**.
- Technologies:** IBM SPSS Modeler, Predictive Analytics, Data Analysis, Machine Learning

TECHNICAL SKILLS

- Programming:** Python, SQL
- Data Analysis:** Pandas, NumPy, Microsoft Excel, Data Cleaning, Data Preprocessing, Exploratory Data Analysis
- Machine Learning:** Scikit-learn, Classification, Predictive Modeling, Model Evaluation

- **Artificial Intelligence:** Artificial Intelligence, Generative AI, Natural Language Processing (NLP), Deep Learning
- **Data Visualization:** Google Looker Studio, Data Visualization, Dashboard Development
- **Automation:** RSS Feeds, Data Pipelines, Workflow Automation, GitHub Actions
- **Tools & Platforms:** Git, GitHub, Google Sheets, IBM SPSS Modeler, Streamlit

EDUCATION

Institute of Advanced Research, Gandhinagar

B.Sc. in Artificial Intelligence & Data Science

2024 – 2028
Currently: 5th Semester

- **Current CGPA: 8.68**
- **4th Semester SGPA: 9.21**

CERTIFICATIONS

- IBM – Introduction to Python
- IBM – Data Visualization
- IBM – Predictive Learning with SPSS Modeler
- DevOps Fundamentals

ADDITIONAL INFORMATION

Languages English, Hindi, Gujarati
Career Interests Data Science, Artificial Intelligence, Machine Learning, Data Analytics
